DUAL-RAIL ALPHA RECEIPT

SiteSealed v1.4-alpha.9 | SR-20260821-REPORTPROOFDETAILS000001

ALPHA / NOT SEALED

1. RECORD

RECORD ID	SR-20260821-REPORTPROOFDETAILS000001
CLASS	Imported file - web workflow
RECEIVED	2026-08-21 09:30:00 UTC
CAPTURE CLAIM	None. This is not a live in-app capture.

2. CRYPTOGRAPHIC DIGESTS

FILE SHA-256	1111111111111111111111111111111111111111111111111111111111111111
MANIFEST SHA-256	2222222222222222222222222222222222222222222222222222222222222222
CIPHER SHA-256	5555555555555555555555555555555555555555555555555555555555555555
RECEIPT SHA-256	3333333333333333333333333333333333333333333333333333333333333333
EVIDENCE DIGEST	4444444444444444444444444444444444444444444444444444444444444444

The plaintext original never left the browser. Its ciphertext and the manifest were encrypted with AES-256-GCM under a client-held key; only ciphertext was stored privately.

3. EXTERNAL PROOF STATUS

RAIL A - RFC 3161 TIME

NOT ISSUED

No Evidency RFC 3161 token is attached. The server receipt time has no eIDAS presumption.

RAIL B - PUBLIC CHAIN

FINALIZED

Ethereum mainnet block 25,748,941; Merkle inclusion path attached and finalized.

RAIL B - FINALIZED ANCHOR DATA

ANCHOR.TRANSACTION	0xaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa
ANCHOR.ADDRESS	0xbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbbb
BLOCK	25,748,941 | chainId 1
MERKLE.ROOT	ccccccccccccccccccccccccccccccccccccccccccccccccccccccccccccccc
MERKLE.PROTOCOL	SITESEALED_MERKLE_SHA256_V1
LEAF	ddddddddddddddddddddddddddddddddddddddddddddddddddddddddddddddd leafIndex 7 of batchSize 1024

VERIFY WITHOUT SITESEALED

1. Fetch the transaction identified by anchor.transaction from any Ethereum node.

2. Decode its calldata as ASCII "SSLD", followed by one version byte and the 32-byte Merkle root.

3. Starting with leaf, recompute the root through each inclusion-path sibling in order, respecting its left/right position.

4. Compare the recomputed root with both the calldata root and merkle.root above.

4. HONEST SCOPE

WHAT THIS RECEIPT CAN SHOW

A locally recalculated matching SHA-256 shows byte identity with this receipt. The cards above list only the external artefacts actually attached; absence remains explicit.

NON-NEGOTIABLE LIMIT

Evidency sandbox tokens are test-only and cannot support a QUALIFIED or SEALED status. Imported files also carry no live-capture, identity, location or truthfulness attestation.

VERIFY LOCALLY - NO FILE UPLOAD

`https://app.sitesealed.com/verify/SR-20260821-REPORTPROOFDETAILS000001`

Select the independently held original in the verifier. Its SHA-256 is recalculated in the browser and is not uploaded.
